**Cloud-based
bioinformatics
platform** for
genomics-based
precision medicine

A Singapore software consultancy and bioinformatics service provider **has developed a cloud-based platform for healthcare and agriculture applications to manage, analyse and visualise** the voluminous 'omics' data through the use of sequencing technologies, cutting edge bioinformatics solutions, data management and analysis.

The company **seeks to partner SMEs from EUREKA Network in research/technical cooperation** with an interest to jointly **participate in bilateral funding programs.**

The Singapore company is keen to establish **research or technical cooperation with SMEs of any size** from participating EUREKA countries to jointly participate in bilateral **funding programs.**

In view of the current CoVid situation, the company is especially keen to partner with those **interested to leverage on its platform to study the SARS-CoV-2** (e.g., metagenomics, gene expression, etc) to work towards a vaccine or treatment.

Type of project partners include:

- **Pharmaceutical** companies/research institutes
- **Life Science** companies/research institutes
- **Agriculture** companies/plant or crop research institutes.
