

aerocom

il Vs. partner per la posta pneumatica

aerocom GCT Srl

ASSOLOMBARDA

Filiera Agroalimentare

Who we are

With a German HQ, aerocom in Italy was founded in 1983 and immediately conquered part of the market in the field of pneumatic conveying systems. More than 700 aerocom systems are currently operating in our country, in many different realities (offices, logistic warehouses, grinding mills, refineries, steelworks, hospitals, supermarkets, petrol stations, banks, motorway toll booths, hotels, pharmacies, etc.).

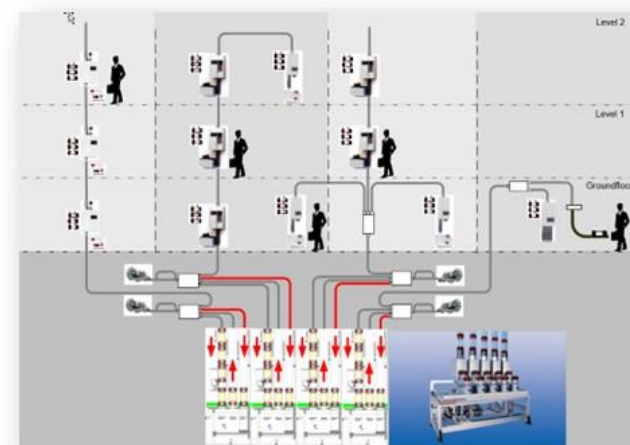

Our proven experience has made aerocom the reference pneumatic tube manufacturer at a global level, recognized in every sector.

What we do

We create customised solutions for clients who need to move values, documents or objects by eliminating routine operations and thus optimizing their manufacturing processes.

Our range extends from fast, efficient and simple manual pneumatic tube systems to fully automatic, low maintenance- pneumatic tube systems with intuitive interfaces that can be controlled remotely and allow user identification and cloud-storage of statistical data.
