

AMUT COMI S.r.l.

ASSOLOMBARDA
Filiera Agroalimentare

AMUT-COMI is specialized in the design and production of thermoforming machines for the production of rigid plastic packaging for the food, electronic, automotive and technical industry. AMUT COMI thermoforming machines are INDUSTRY 4.0 ready and can be integrated into the smart factory and they are suitable to thermoform a wide range of plastics, such as HIPS, BOPS, PP, PET, PVC, PLA and other materials.

AMUT COMI produce high speed thermoforming machines with modular configuration with steel rule or match-metal cutting technology to produce many items such as trays, lids, fruit and vegetable punnets, flower pots, clamshells containers, cups and plates. AMUT COMI thermoforming machines offers an high level of standardization, rugged durability, flexible production for a wide range of articles and increased high-speed performance. We build full electric machines and energy-efficient to fulfil our motto **GO green**
