

Who we are

Bluefoundation is an engineering company focused on the development of **industrial decarbonisation** and **sustainable transition projects**.

Bluefoundation was established in response to the growing need to identify effective solutions for reducing climate-changing emissions and achieving sustainable development goals in the industrial and energy sectors.

Service description

The Decarbonisation Toolkit:

Designing the decarbonisation of industrial plants by choosing the best mix of available technologies.

A guided path from concept to implementation.

The Technology Scouting:

Solving technology and business innovation needs through a structured 3-phase approach. An effective support to guide your sustainable development efforts and scientifically motivate your choices.
