

# Centro Diagnostico Italiano

*Since 1975 preventive health care  
is our mission*

## Who we are

The Italian Diagnostic Center, active in Milan since 1975, is an outpatient health structure oriented towards the prevention, diagnosis and therapy of diseases in the setting of a day-hospital regime. CDI headquarter is accredited by Joint Commission International since 2006. It operates in the Lombardia area through a network of 23 structures, located in Milan, Pavia and Varese provinces.

## Product description

[CDI Check/ A personalized Check Up](#)  
CDICHECK is a comprehensive and personalized clinical pathway, carried out under the oversight of a Coordinating Internal Medicine Specialist, that leads to really customizing the whole diagnostic process with a view to evidence for all risk factors.

[Cyberknife / The radiosurgery robot](#)  
CyberKnife is a radiosurgery system that automatically monitors and accommodates patient and tumour movements throughout the procedure. No invasive anchoring to a rigid frame is required, and therefore there is no need for the patient to be hospitalized.
