### Who we are

ECODAT, founded in 2014, is a start-up company, qualified as innovative, and based in Corbetta (West Milan).

The core of the company is a group of engineers and technicians who have a background of multidisciplinary professional experiences. With regards to the automotive sector, both as road and as motorsport vehicles, the activities and experiences are specialised in:

- .Data acquisition systems/images for high-end and motorsport cars
- .Telemetry systems for F1 cars
- .Inverters for electric and hybrid vehicles
- .High speed electrical motor for traction and energy recovery systems
- .Placement and tracking on the road and on the track
