

Who we are

Since 1941 Elesa S.p.A. has been designing and manufacturing the widest range of **standard components for industrial machines and equipment**.

A corporate culture, strongly committed to **product quality** combined with a sensitivity for **design and ergonomics** led to the creation of unique products, recognisable worldwide.

In the industrial plant of Monza (Milan, Italy), tens of millions of pieces are annually produced using **the most advanced technologies and automation**.

A spreaded distribution network and **12 branches abroad** allow Elesa to be present in over 60 countries worldwide.

What we do

Elesa products portfolio offers **1,224 product series** for a total of **45,000 standard product codes**.

Operating and clamping elements, handles, knobs, position indicators, indexing plungers, vibration dumping elements, transfer units, hinges, levelling feet, castors, wheels and accessories for hydraulic systems represent our range destined for the most diverse industrial sectors.

A **modernly equipped internal laboratory** helps to ensure **maximum consistency in the quality of standard products** and allows customized **testing** according to the customers' conditions of use.
