Who we are

Lettera G, founded in Milan in 2007 as a branch of Giovanardi spa, a company active in BTB since 1919, designs and manufactures high-design objects and furniture elements. Lettera G benefits from the talent and creative flair of Italian designers chosen in collaboration with POLI-design of the Politecnico of Milan. In the Giovanardi workshop, a context that is essential to the creation and development of design projects, these designers have built up an impressive and distinguished catalogue characterised by original and unique ideas.

Product description

Lettera G objects, furnishings and projects are entirely developed in the Concorezzo factory, between Milan and the laborious Brianza area.

Each individual piece of furnishing of the collections requires a dedicated finishing stage, entrusted to the skill of artisans and technicians who express Italian excellence in every stage of production, both through the use of sophisticated CNC machines such as lasers, pantographs and robotic systems, as well as in particular manual processes such as grinding, polishing, sanding and assembly.
