

Who we are

H4D is a french company created in 2008 by Dr. Baudino to develop a complete array of teleconsultation's services in order to ensure professional, secure and continuous medical assistance and facilitate citizens' access to healthcare.

After several years of teleconsultation activity, H4D doctors have developed protocols of telesemiology to train and assist doctors in realizing their teleconsultations.

Product description

The Consult Station® is the first connected medical booth which allows to carry out teleconsultations with a doctor via video technology. Thanks to a range of measuring and examining devices present in the cabin, the doctor can perform a clinical examination in realtime, provide a complete diagnosis remotely and, if necessary, issue a prescription.

All doctors using the device are fully trained by H4D doctors in order to carry out professional and complete teleconsultation.
