**HUB
PROJECT
ITALIA**

ASSOLOMBARDA

Filiera Energy Sustainable Global Chain

Tomorrow is in today's choices

ABOUT US

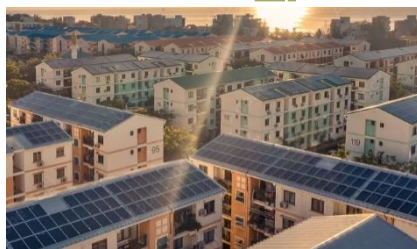

Hub Project Italia was born as a meeting point between **energy needs** and the **most performing technological responses** in the sector.

The objective is to **generate virtuous, scalable and replicable models**, starting from the development of **Energy Communities** up to **Virtual Power Plants**.

Diffusion of **technologies for the production of clean energy**, creation of VPPs with energy exchange, to transform the neighborhoods of **our cities into mini circular economies**.

OUR SERVICES

Hub Green Project is our innovative project for a platform serving CERs.

Fintech functions merge with **blockchain technology** to facilitate the creation of **new energy communities and self-consumption groups** through intelligent management of self-produced energy with renewable source systems.

Let's implement the **energy transition** with finance dedicated to investments that generate **environmental benefits**.

- Management of GSE incentives
- Tax bonuses for building redevelopment
- new sustainable approaches to plant retrofitting
- electrification of urban thermal loads
