

## ICIM SpA

ASSOLOMBARDA

Filiera Energy Sustainable Global Chain

### WHO WE ARE

Committed to spreading the culture of regulatory compliance, ICIM SpA - part of the ICIM Group - is a leading accredited certification body in various sectors in the certification of management systems, products and professionals. It is a reference body in the field of industrial transformation, digital and ecological transition, I4.0 and Transition Plan 5.0. Corporate services related to environmental sustainability, inclusion and gender equality complete the offer.

### PRODUCT DESCRIPTION

ICIM SpA's services for companies in the Energy Sustainable Global Chain include HP Keymark certification for heat pumps, Solar Keymark for collectors and solar thermal systems, ISCC EU for sustainability of biofuels and bioliquids, and sustainability certification of production chain products.

Certificates of conformity 4.0 for access to tax benefits. Verification for HFCs imports into the EU (F-gas in bulk or pre-loaded in equipment) and proof of conformity for customs clearance. Assessment of compliance with the DNSH-Do Not Significant Harm principle in project proposals that can be financed with NRRP funds. Certification of professional figures F-Gas, EGE, welders and others.
