

## R.I. SRL

*exclusive distributor of  
SBH shoring system for Italy*

### Who we are

R.I. was founded in 1980 and since then has distinguished itself for the commercialization of **trench shoring systems both for canalization and foundation works**, such as deep tank replacement; we deliver as well our engineering consultancy on the use of these systems.

We have been and still are suppliers of important Italian companies and as references we can boast some very important achievements, last but not least supplies for EXPO 2015, M4 BLU metro in Milan and construction sites in the new City Life district again in Milan.

### Products/Services

#### SBH trench shoring systems

Since the 80' SBH has been the partner for high quality trench shoring systems. At the company's head office in Heinsberg, Germany, practicable solutions are created for any needs: from ultralight aluminium trench shoring to triple slide rail trench shoring for great depths.

#### Technical consulting services

R.I. is able to assist its Clients in the realization of their projects both in the phase of tenders participation and in the execution one, thanks to our extensive and long-lasting experience in the shoring business. We provide trench shoring systems best suited to the various needs, meeting the standards of security required by the final customer.
