## Who we are

Welcome to Rollwasch® Italiana S.p.a., an Italian company established in 1950 specialized in the mass surfaces treatment, like vibratory finishing, robotic finishing and barreling. Rollwasch manufactures machines and barreling plants, as well as waste water treatments plants and centrifugal force filters. Robotized finishing systems with specific destination to the aerospace field, wave finishing, precision grinding and sandblasting/shot peening. Moreover, Rollwasch produces chemical compounds and several types of abrasive chips, media, finishing granulates and high quality consumables.
