

FOLLOW YOUR DATA. FIND YOUR VALUE.

Our company is vertically integrated in the **data** industry: from the collection and the **organization of information** through our proprietary technologies (columnar Database Management System - DBMS) to **advanced analytics**, using various techniques ranging from Business Intelligence to **Artificial Intelligence/ Machine Learning**.

MISSION

Develop innovative technologies and solutions to conduct data analysis and provide decision support.

VISION

Allow you to access and analyze your data quickly and easily.

- ▶ **SADAS ENGINE** - Columnar DBMS specifically designed to obtain high performances in the processing of large volumes of data. Ideal for IIoT applications.
- ▶ **SADAS WEB** - Web interface to directly consult, query and analyze any archive present in a Sadas DB.
- ▶ **SADAS Business Intelligence** - Tool to create applications, manage dashboards and reports that can be fully consulted through any browser.
- ▶ Sadas has a **team** specialized in **Advanced Analytics & Machine Learning** with a variety of skills ranging from mathematics to economics and programming.
