

SEA Vision was born in 1995 from a University spin-off of an engineering department specialized in the artificial vision. Today more than **306 people** work in the company.

Thanks to the know how expertise and the deep understanding of pharmaceutical industry regulations, SEA Vision is a global market leader in the design and development of **vision systems, serialization solutions, and 4.0 Suite for the pharmaceutical sector.**

SEA Vision has a network of 8 sales and service **offices located in all major global markets**, managing sales activities and technical on-site support assistance services. The expertise in innovative projects and the constant **commitment to Research & Development** allow the company to provide customers with top technological solutions for innovative projects.

SEA Vision is a **software house specialized in design and development of vision inspection systems** to be installed on pharmaceuticals packaging machines.

The quality of the developed technologies combined with **25 years of expertise** in the pharmaceutical field, led SEA Vision to **be recognized globally in the list of the top 5 sector leaders.**

The product portfolio is divided into three main business areas:

1. vision software for **quality control** of pharmaceutical products
2. solutions for drug **serialization** and traceability
3. **Business Intelligence 4.0** Software Suite.

SEA Vision also offers a range of **on-site or remote technical assistance services** designed to meet the specific needs of pharmaceutical and OEM customers.
