

Turboalgor S.r.l.

Turboalgor turns green the cooling industry.

Turboalgor is an innovative Italian SME startup, participated by Angelantoni Industrie Group, which has the aim of **making the industrial refrigeration sector GREEN**. Turboalgor brings to this sector a very innovative solution of automotive derivation and covered by an international patent, which guarantees **energy saving up to +23% and cooling capacity increase up to +56%** in low temperature refrigeration systems.

We turn to **all the companies operating along the cold chain**, such as Retail, Chemical & Pharma, Food and Refrigerated Logistics with a range of products that covers both **low and medium temperatures** and in the short term also **industrial air conditioning**, in the range of electrical power absorbed from 20 to 300kW. Turboalgor has already made the first installations with companies operating in the food and refrigerated logistics sector, which are achieving **significant energy savings**.
